TOXICOLOGY

www.elsevier.com/locate/toxicol

Subject index of volume 211

Acrylamide; Genotoxicity; Red blood cells; Tissue distribution; Virus infection **211**, 70

Activity; Manganese chloride tetrahydrate; Rats; Restraint stress; Learning **211**, 59

Adriamycin; Low-molecular-weight heparin; Cytotoxicity; Nephrotic syndrome; Glycosaminoglycan; Hyperlipidemia **211**, 77

AE2; Dapsone; Cholestasis; Bile salt independent fraction of bile flow; Bicarbonate; Mrp2 **211**, 97

AhR; PCB126; DMBA; CYP1; Mammary carcinoma; Rat **211**, 231

Akt; Diallyl disulfide; Antioxidant; Apoptosis; PI3K **211**, 86

Ames test; *o*-Aminoazotoluene; Cytochrome P450 1A1 and 1A2; CYP1A inducers; Mouse liver **211**, 132

Animal model; Emphysema; Metalloproteases; Cadmium **211**, 36

Antioxidant; Diallyl disulfide; Apoptosis; PI3K; Akt **211**, 86

Apoptosis; Manganese chloride; Leydig cell; Steroidogenic acute regulatory (StAR) protein; ATP; $[Ca^{2+}]i$; Cell cycle arrest **211**, 1

Apoptosis; Diallyl disulfide; Antioxidant; PI3K; Akt **211**, 86

Apoptosis; MCPD; Immunotoxicity; Thymic subsets; Macrophage activity **211**, 187

Apoptosis; Cadmium; Epithelial lung cells; MAP-kinases; PKC **211**, 253

Arsenic; Oxidative stress; Cysteine; Methionine; Ascorbic acid; Thiamine **211**, 26

Arsenic–glutathione complex; Speciation; HPLC–ICP MS; Bile **211**, 115

Ascorbic acid; Oxidative stress; Arsenic; Cysteine; Methionine; Thiamine **211**, 26

ATP; Manganese chloride; Leydig cell; Steroidogenic acute regulatory (StAR) protein; $[Ca^{2+}]i$; Cell cycle arrest; Apoptosis **211**, 1

Behavioral development; Lead; Neurotoxity; Ultrasonic vocalization **211**, 49

Benzo[*a*]pyrene; Cyclosporin A; Bis(tri-*n*-butyltin)oxide; Local lymph node assay; Immune function assay; 2,4-Dinitrochlorobenzene **211**, 107

Bicarbonate; Dapsone; Cholestasis; Bile salt independent fraction of bile flow; Mrp2; AE2 **211**, 97

Bile salt independent fraction of bile flow; Dapsone; Cholestasis; Bicarbonate; Mrp2; AE2 **211**, 97

Bile; Arsenic–glutathione complex; Speciation; HPLC–ICP MS **211**, 115

Biomarker; Polycyclic aromatic hydrocarbons; 3-Methylcholanthrene; Lymphocyte proliferation **211**, 156

Bis(tri-*n*-butyltin)oxide; Cyclosporin A; Benzo[*a*]pyrene; Local lymph node assay; Immune function assay; 2,4-Dinitrochlorobenzene **211**, 107

doi:10.1016/S0300-483X(05)00216-7

Blood lymphocyte; Skeletal muscle; Nicotinic acetylcholine receptor; Intermediate myasthenia syndrome; Organophosphate **211**, 149

5-Bromo-2′-deoxyuridine; Contact dermatitis; Murine local lymph-node assay; Guinea pig maximization test; Risk assessment; Elicitation threshold; Minimum induction dose **211**, 165

C-8; Perfluorooctanoate; Pharmacokinetics; Placental transport; Lactational transport; PFOA **211**, 139

[Ca^{2+}]*i*; Manganese chloride; Leydig cell; Steroidogenic acute regulatory (StAR) protein; ATP; Cell cycle arrest; Apoptosis **211**, 1

Cadmium; Animal model; Emphysema; Metalloproteases **211**, 36

Cadmium; Apoptosis; Epithelial lung cells; MAP-kinases; PKC **211**, 253

Calcium; Cremophor EL; Cell death; Lymphocyte; Necrosis **211**, 179

Cell cycle arrest; Manganese chloride; Leydig cell; Steroidogenic acute regulatory (StAR) protein; ATP; [Ca^{2+}]*i*; Apoptosis **211**, 1

Cell death; Cremophor EL; Calcium; Lymphocyte; Necrosis **211**, 179

Cholestasis; Dapsone; Bile salt independent fraction of bile flow; Bicarbonate; Mrp2; AE2 **211**, 97

Chromium; Vitamins deficiency; Protection **211**, 124

Contact dermatitis; Murine local lymph-node assay; Guinea pig maximization test; 5-Bromo-2′-deoxyuridine; Risk assessment; Elicitation threshold; Minimum induction dose **211**, 165

COX-1; COX-2; Cyclooxygenase; Gastroschisis; Non steroidal anti inflammatory drugs; NSAID; Omphalocele; Prenatal toxicity; Umbilical hernia; Ventricular septal defect **211**, 12

COX-2; COX-1; Cyclooxygenase; Gastroschisis; Non steroidal anti inflammatory drugs; NSAID; Omphalocele; Prenatal toxicity; Umbilical hernia; Ventricular septal defect **211**, 12

Cremophor EL; Cell death; Calcium; Lymphocyte; Necrosis **211**, 179

Cyclooxygenase; COX-1; COX-2; Gastroschisis; Non steroidal anti inflammatory drugs; NSAID; Omphalocele; Prenatal toxicity; Umbilical hernia; Ventricular septal defect **211**, 12

Cyclosporin A; Bis(tri-*n*-butyltin)oxide; Benzo[*a*]pyrene; Local lymph node assay; Immune function assay; 2,4-Dinitrochlorobenzene **211**, 107

CYP1; PCB126; DMBA; AhR; Mammary carcinoma; Rat **211**, 231

CYP1A inducers; *o*-Aminoazotoluene; Cytochrome P450 1A1 and 1A2; Ames test; Mouse liver **211**, 132

Cysteine; Oxidative stress; Arsenic; Methionine; Ascorbic acid; Thiamine **211**, 26

Cytochrome P450 1A1 and 1A2; *o*-Aminoazotoluene; CYP1A inducers; Ames test; Mouse liver **211**, 132

Cytochrome P450 3a; Lipopolysaccharide; *Pregnane X receptor*; *Multidrug resistance 1*; Reactive oxygen species; Placenta **211**, 242

Cytotoxicity; Low-molecular-weight heparin; Adriamycin; Nephrotic syndrome; Glycosaminoglycan; Hyperlipidemia **211**, 77

Dapsone; Cholestasis; Bile salt independent fraction of bile flow; Bicarbonate; Mrp2; AE2 **211**, 97

Diallyl disulfide; Antioxidant; Apoptosis; PI3K; Akt **211**, 86

Diazinon; Pesticides; Organophosphate insecticides; Vitamin E; Hepatotoxicity; Histopathology **211**, 197

Dichloroacetate; Trichloroethylene; Trichloroacetate; Hepatocyte replication; Hepatocarcinogenesis; Peroxisome proliferators **211**, 220

2,4-Dinitrochlorobenzene; Cyclosporin A; Bis(tri-*n*-butyltin)oxide; Benzo[*a*]pyrene; Local lymph node assay; Immune function assay **211**, 107

DMBA; PCB126; CYP1; AhR; Mammary carcinoma; Rat **211**, 231

Elicitation threshold; Contact dermatitis; Murine local lymph-node assay; Guinea pig maximization test; 5-Bromo-2′-deoxyuridine; Risk assessment; Minimum induction dose **211**, 165

Emphysema; Animal model; Metalloproteases; Cadmium **211**, 36

Endocrine active chemicals; Genistein; Nonylphenol; Ethinyl estradiol; Vinclozolin; Methoxychlor and developmental myelotoxicity **211**, 207

Epithelial lung cells; Apoptosis; Cadmium; MAP-kinases; PKC **211**, 253

Ethinyl estradiol; Endocrine active chemicals; Genistein; Nonylphenol; Vinclozolin; Methoxychlor and developmental myelotoxicity **211**, 207

Gastroschisis; COX-1; COX-2; Cyclooxygenase; Non steroidal anti inflammatory drugs; NSAID; Omphalocele; Prenatal toxicity; Umbilical hernia; Ventricular septal defect **211**, 12

Genistein; Endocrine active chemicals; Nonylphenol; Ethinyl estradiol; Vinclozolin; Methoxychlor and developmental myelotoxicity **211**, 207

Genotoxicity; Acrylamide; Red blood cells; Tissue distribution; Virus infection **211**, 70

Glycosaminoglycan; Low-molecular-weight heparin; Adriamycin; Cytotoxicity; Nephrotic syndrome; Hyperlipidemia **211**, 77

Guinea pig maximization test; Contact dermatitis; Murine local lymph-node assay; 5-Bromo-2′-deoxyuridine; Risk assessment; Elicitation threshold; Minimum induction dose **211**, 165

Hepatocarcinogenesis; Trichloroethylene; Dichloroacetate; Trichloroacetate; Hepatocyte replication; Peroxisome proliferators **211**, 220

Hepatocyte replication; Trichloroethylene; Dichloroacetate; Trichloroacetate; Hepatocarcinogenesis; Peroxisome proliferators **211**, 220

Hepatotoxicity; Pesticides; Organophosphate insecticides; Diazinon; Vitamin E; Histopathology **211**, 197

Histopathology; Pesticides; Organophosphate insecticides; Diazinon; Vitamin E; Hepatotoxicity **211**, 197

HPLC–ICP MS; Arsenic–glutathione complex; Speciation; Bile **211**, 115

Hyperlipidemia; Low-molecular-weight heparin; Adriamycin; Cytotoxicity; Nephrotic syndrome; Glycosaminoglycan **211**, 77

Immune function assay; Cyclosporin A; Bis(tri-*n*-butyltin)oxide; Benzo[*a*]pyrene; Local lymph node assay; 2,4-Dinitrochlorobenzene **211**, 107

Immunotoxicity; MCPD; Thymic subsets; Macrophage activity; Apoptosis **211**, 187

Intermediate myasthenia syndrome; Skeletal muscle; Blood lymphocyte; Nicotinic acetylcholine receptor; Organophosphate **211**, 149

Lactational transport; Perfluorooctanoate; Pharmacokinetics; Placental transport; PFOA; C-8 **211**, 139

Lead; Behavioral development; Neurotoxity; Ultrasonic vocalization **211**, 49

Learning; Manganese chloride tetrahydrate; Rats; Restraint stress; Activity **211**, 59

Leydig cell; Manganese chloride; Steroidogenic acute regulatory (StAR) protein; ATP; $[Ca^{2+}]i$; Cell cycle arrest; Apoptosis **211**, 1

Lipopolysaccharide; *Pregnane X receptor*; *Cytochrome P450 3a*; *Multidrug resistance 1*; Reactive oxygen species; Placenta **211**, 242

Local lymph node assay; Cyclosporin A; Bis(tri-*n*-butyltin)oxide; Benzo[*a*]pyrene; Immune function assay; 2,4-Dinitrochlorobenzene **211**, 107

Low-molecular-weight heparin; Adriamycin; Cytotoxicity; Nephrotic syndrome; Glycosaminoglycan; Hyperlipidemia **211**, 77

Lymphocyte proliferation; Polycyclic aromatic hydrocarbons; 3-Methylcholanthrene; Biomarker **211**, 156

Lymphocyte; Cremophor EL; Cell death; Calcium; Necrosis **211**, 179

Macrophage activity; MCPD; Immunotoxicity; Thymic subsets; Apoptosis **211**, 187

Mammary carcinoma; PCB126; DMBA; CYP1; AhR; Rat **211**, 231

Manganese chloride tetrahydrate; Rats; Restraint stress; Activity; Learning **211**, 59

Manganese chloride; Leydig cell; Steroidogenic acute regulatory (StAR) protein; ATP; $[Ca^{2+}]i$; Cell cycle arrest; Apoptosis **211**, 1

MAP-kinases; Apoptosis; Cadmium; Epithelial lung cells; PKC **211**, 253

MCPD; Immunotoxicity; Thymic subsets; Macrophage activity; Apoptosis **211**, 187

Metalloproteases; Animal model; Emphysema; Cadmium **211**, 36

Methionine; Oxidative stress; Arsenic; Cysteine; Ascorbic acid; Thiamine **211**, 26

Methoxychlor and developmental myelotoxicity; Endocrine active chemicals; Genistein; Nonylphenol; Ethinyl estradiol; Vinclozolin **211**, 207

3-Methylcholanthrene; Polycyclic aromatic hydrocarbons; Lymphocyte proliferation; Biomarker **211**, 156

Minimum induction dose; Contact dermatitis; Murine local lymph-node assay; Guinea pig maximization test; 5-Bromo-2′-deoxyuridine; Risk assessment; Elicitation threshold **211**, 165

Mouse liver; *o*-Aminoazotoluene; Cytochrome P450 1A1 and 1A2; CYP1A inducers; Ames test **211**, 132

Mrp2; Dapsone; Cholestasis; Bile salt independent fraction of bile flow; Bicarbonate; AE2 **211**, 97

Multidrug resistance 1; Lipopolysaccharide; *Pregnane X receptor*; *Cytochrome P450 3a*; Reactive oxygen species; Placenta **211**, 242

Murine local lymph-node assay; Contact dermatitis; Guinea pig maximization test; 5-Bromo-2′-deoxyuridine; Risk assessment; Elicitation threshold; Minimum induction dose **211**, 165

Necrosis; Cremophor EL; Cell death; Calcium; Lymphocyte **211**, 179

Nephrotic syndrome; Low-molecular-weight heparin; Adriamycin; Cytotoxicity; Glycosaminoglycan; Hyperlipidemia **211**, 77

Neurotoxity; Lead; Behavioral development; Ultrasonic vocalization **211**, 49

Nicotinic acetylcholine receptor; Skeletal muscle; Blood lymphocyte; Intermediate myasthenia syndrome; Organophosphate **211**, 149

Non steroidal anti inflammatory drugs; COX-1; COX-2; Cyclooxygenase; Gastroschisis; NSAID; Omphalocele; Prenatal toxicity; Umbilical hernia; Ventricular septal defect **211**, 12

Nonylphenol; Endocrine active chemicals; Genistein; Ethinyl estradiol; Vinclozolin; Methoxychlor and developmental myelotoxicity **211**, 207

NSAID; COX-1; COX-2; Cyclooxygenase; Gastroschisis; Non steroidal anti inflammatory drugs; Omphalocele; Prenatal toxicity; Umbilical hernia; Ventricular septal defect **211**, 12

o-Aminoazotoluene; Cytochrome P450 1A1 and 1A2; CYP1A inducers; Ames test; Mouse liver **211**, 132

Omphalocele; COX-1; COX-2; Cyclooxygenase; Gastroschisis; Non steroidal anti inflammatory drugs; NSAID; Prenatal toxicity; Umbilical hernia; Ventricular septal defect **211**, 12

Organophosphate insecticides; Pesticides; Diazinon; Vitamin E; Hepatotoxicity; Histopathology **211**, 197

Organophosphate; Skeletal muscle; Blood lymphocyte; Nicotinic acetylcholine receptor; Intermediate myasthenia syndrome **211**, 149

Oxidative stress; Arsenic; Cysteine; Methionine; Ascorbic acid; Thiamine **211**, 26

PCB126; DMBA; CYP1; AhR; Mammary carcinoma; Rat **211**, 231

Perfluorooctanoate; Pharmacokinetics; Placental transport; Lactational transport; PFOA; C-8 **211**, 139

Peroxisome proliferators; Trichloroethylene; Dichloroacetate; Trichloroacetate; Hepatocyte replication; Hepatocarcinogenesis **211**, 220

Pesticides; Organophosphate insecticides; Diazinon; Vitamin E; Hepatotoxicity; Histopathology **211**, 197

PFOA; Perfluorooctanoate; Pharmacokinetics; Placental transport; Lactational transport; C-8 **211**, 139

Pharmacokinetics; Perfluorooctanoate; Placental transport; Lactational transport; PFOA; C-8 **211**, 139

PI3K; Diallyl disulfide; Antioxidant; Apoptosis; Akt **211**, 86

PKC; Apoptosis; Cadmium; Epithelial lung cells; MAP-kinases **211**, 253

Placenta; Lipopolysaccharide; *Pregnane X receptor*; *Cytochrome P450 3a*; *Multidrug resistance 1*; Reactive oxygen species **211**, 242

Placental transport; Perfluorooctanoate; Pharmacokinetics; Lactational transport; PFOA; C-8 **211**, 139

Polycyclic aromatic hydrocarbons; 3-Methylcholanthrene; Lymphocyte proliferation; Biomarker **211**, 156

Pregnane X receptor; Lipopolysaccharide; *Cytochrome P450 3a*; *Multidrug resistance 1*; Reactive oxygen species; Placenta **211**, 242

Prenatal toxicity; COX-1; COX-2; Cyclooxygenase; Gastroschisis; Non steroidal anti inflammatory drugs; NSAID; Omphalocele; Umbilical hernia; Ventricular septal defect **211**, 12

Protection; Vitamins deficiency; Chromium **211**, 124

Rat; PCB126; DMBA; CYP1; AhR; Mammary carcinoma **211**, 231

Rats; Manganese chloride tetrahydrate; Restraint stress; Activity; Learning **211**, 59

Reactive oxygen species; Lipopolysaccharide; *Pregnane X receptor*; *Cytochrome P450 3a*; *Multidrug resistance 1*; Placenta **211**, 242

Red blood cells; Acrylamide; Genotoxicity; Tissue distribution; Virus infection **211**, 70

Restraint stress; Manganese chloride tetrahydrate; Rats; Activity; Learning **211**, 59

Risk assessment; Contact dermatitis; Murine local lymph-node assay; Guinea pig maximization test; 5-Bromo-2′-deoxyuridine; Elicitation threshold; Minimum induction dose **211**, 165

Skeletal muscle; Blood lymphocyte; Nicotinic acetylcholine receptor; Intermediate myasthenia syndrome; Organophosphate **211**, 149

Speciation; Arsenic–glutathione complex; HPLC–ICP MS; Bile **211**, 115

Steroidogenic acute regulatory (StAR) protein; Manganese chloride; Leydig cell; ATP; $[Ca^{2+}]i$; Cell cycle arrest; Apoptosis **211**, 1

Thiamine; Oxidative stress; Arsenic; Cysteine; Methionine; Ascorbic acid **211**, 26

Thymic subsets; MCPD; Immunotoxicity; Macrophage activity; Apoptosis **211**, 187

Tissue distribution; Acrylamide; Genotoxicity; Red blood cells; Virus infection **211**, 70

Trichloroacetate; Trichloroethylene; Dichloroacetate; Hepatocyte replication; Hepatocarcinogenesis; Peroxisome proliferators **211**, 220

Trichloroethylene; Dichloroacetate; Trichloroacetate; Hepatocyte replication; Hepatocarcinogenesis; Peroxisome proliferators **211**, 220

Ultrasonic vocalization; Lead; Behavioral development; Neurotoxity **211**, 49

Umbilical hernia; COX-1; COX-2; Cyclooxygenase; Gastroschisis; Non steroidal anti inflammatory drugs; NSAID; Omphalocele; Prenatal toxicity; Ventricular septal defect **211**, 12

Ventricular septal defect; COX-1; COX-2; Cyclooxygenase; Gastroschisis; Non steroidal anti inflammatory drugs; NSAID; Omphalocele; Prenatal toxicity; Umbilical hernia **211**, 12

Vinclozolin; Endocrine active chemicals; Genistein; Nonylphenol; Ethinyl estradiol; Methoxychlor and developmental myelotoxicity **211**, 207

Virus infection; Acrylamide; Genotoxicity; Red blood cells; Tissue distribution **211**, 70

Vitamin E; Pesticides; Organophosphate insecticides; Diazinon; Hepatotoxicity; Histopathology **211**, 197

Vitamins deficiency; Chromium; Protection **211**, 124
